

Coming soon: the Auto IT special industry report on the digital supply chain that will revolutionise car making

As OEMs transform themselves into agile mobility providers, they need suppliers to adapt to the new digital landscape.

Our special report will analyse the key trends, technologies, providers and people shaping tomorrow's supply chain to create business value.

PLUS: Executing change in the aftermarket chain

The global automotive aftermarket will exceed US\$1 trillion by 2022. As people keep cars longer and OEMs invest in full auto lifecycle management, what are the digital opportunities and challenges for the aftermarket supply chain?

Special supply chain content round up
